INDUSTRIAL MAGNETICS.

OUR BRAND VALUES

LOYALTY, DEPENDABILITY AND TRUST

Our culture of loyalty promotes lasting careers at Industrial Magnetics, which helps staff form longstanding relationships with customers who know us by name. Customers can depend on us to provide timely service, around-the-clock technical support and durable products that last. Thanks to our knowledgeable experts with decades of industry experience, customers trust the quality and accuracy of our recommended solutions.

Industrial Magnetics, Inc. is an industry leader in providing both permanent magnets and electromagnets for work holding, lifting, fixturing, conveying and magnetic separation. At IMI, our specialty is custom fabricating! We design, engineer & manufacture magnetic assemblies and separation devices for our customers' specific requirements. We take pride in the quality and performance of our products.

With worldwide distribution through a combination of a direct sales force and manufacturers representatives, we strive to provide personalized

service and innovative solutions to meet the exact needs of your application. THREE PRODUCT GROUPS, ONE GOAL...the right product for the application at the right time for our customer.

IMI is proud to be a United States - based manufacturer of magnetic assemblies and our USA M.A.D.E[™] logo is how we like to show it. You will find our USA M.A.D.E[™] logo on any of our products that are **Manufactured - Assembled -Designed - Engineered** here, in the USA, at our facilities.

MAGNET MATERIALS

Flexible Magnetic strips & sheets. These low energy polymer bonded magnets can form to contours and are often used for labeling or advertising. The strips or sheets can be cut or punched. Maximum temperature 160°F (70°C).

Ceramic magnets are made of Strontium Ferrite (SrFe). Ceramic magnets are a **medium strength** magnet material with a high resistance to demagnetization, long time stability (loses 0.5% of its magnetic strength in 100 years). It is a brittle material that has to be cut with diamond tipped blades. Temperature rage -148°F (-60°C) to 480°F (249°C). CARBON

Alnico magnets are made of Aluminum, Nickel and Cobalt (AlNiCo). Alnico is selected for use in **high heat** environments. It offers medium strength with the best temperature characteristics of any common magnet material. Alnico magnets have a medium resistance to demagnetization. This material is very hard and brittle and cannot be machined or drilled by ordinary means. Temperature range -167°F (-75°C) to 800°F (427°C).

Rare Earth Neodymium-Iron-Boron (NdFeB) magnets, commonly referred to as Neo, provides the **highest magnetic strength** of any magnet material. Neo has a very high resistance to demagnetization and is ideal for applications requiring the maximum strength available in any given size. Neo is usually coated or plated to prevent oxidization due to its high iron content and therefore grinding of Neo material must be avoided. Temperature range -302°F (-150°C) to 180°F (82°C).

Rare Earth Samarium Cobalt (SmCo) a high magnetic strength (similar to Neo) combined with high temperature range making it ideal for applications requiring high strength in hot environments. Temperature range -302°F (-150°C) to 392°F (200°C).

MAGNET BASICS & SAFETY INFORMATION

MAGNET SAFETY FACTORS

Our magnetic material meets Magnetic Materials Producers Association (MMPA) standards for physical guality and magnetic properties. Some magnetic material is brittle in nature and minor defects such as chips and hairline cracks are unavoidable. When selecting a magnet for your application, consider the following factors that may affect performance of the magnet:

- » Physical shape of the part where contacting the magnet will affect the holding power of the magnet
- » The surface area & condition of your steel item (rough, rusty, dirty, oily, painted or coated) will create a gap and have negative affect on the magnets hold to the surface (also known as Air-gap*)
- » Part size, thickness weight and orientation must be considered to help determine the strength of magnet required
- » The ambient or part temperature for the application will help determine the type of magnet material needed
- » Gauss levels limits for handling a part may prevent the use of magnets or limit the type/strength that can be used
- » When protecting the finish of a part the type of magnet used may be limited in order to contact the part without damaging the finish

*Air gap - The air, protective coating, paint, galvanizing, oil, rust, dirt, etc, between the magnet and the part,

LOSS OF MAGNETISM

Under normal use conditions, a permanent magnet can experience a decrease in its original holding value. The most common factors which can cause a loss of strength include:

- » Every day wear and tear on the magnets working face or surface
- » Exposure to extreme temperatures outside the magnet's temperature range.
- » Severe blows, constant vibration or shock to the magnet. Do not use a blunt instruments to position magnets.
- » Exposure to electrical currents, such as large motors or generators. Never use the magnet as part of a ground circuit.
- » Exposure to vibration.

LIFT MAGNET SAFETY FACTORS

Lift magnets can be effective even when the surfaces of the magnet and/or load have dirt, paint, scale or other debris on them. However, the best efficiency of any magnetic lift is achieved when both the magnet and the load are clean with good, uninterrupted contact between them (minimal air gap).

- » Avoid positioning the magnet in places on the load that have limited contact, are dirty or have rough surface texture
- » Clear any foreign material from the load before setting the magnet on it
- » Often check the mechanical condition of the magnetic contact face to make sure it has not been damaged during use
- » After using the lift magnet, protect the pole surfaces with oil to prevent them from rusting

PERCENTAGE OF STATED LIFTING POWER BY MATERIAL

PER	CENTAGE OF STATED LIFTING POWER BY I	MATERIAL	PEF	CENTAGE OF STATED LIFTING POWER	R BY SURFACE FINISH
≂⊨	LOW CARBON 0.05 - 0.29%	100%	ш	GROUND SURFACE	100%
	MODERATE CARBON 0.30 - 0.59%	85%	=AC	ROUGH MACHINED	100%
AR No	HIGH CARBON 0.60 - 0.99%	75%	FIN	FOUNDRY FINISH	85%
ΟÖ	HIGHER CARBON = HIGHER RESIDUAL*		<u>N</u> _	ROUGH CAST	65%

* HIGH CARBON STEEL (TOOL STEEL) WILL ABSORB MAGNETISM & MAY MAGNETICALLY STICK TO STEEL SURFACES, SUCH AS THE MAGNET, OR ATTRACT FERROUS PARTICLES.

DESIGN FACTOR & WORKING LOAD LIMITS

Design Factor is the relation of the magnet's labeled Working Load Limit (WLL) compared to the magnet's maximum lifting value under ideal conditions. Ideal conditions are when a magnet is new and pulled off a newly machined, thick, low carbon steel plate. The force it takes to break a magnet away from the steel surface is the "maximum" lifting value.

Unless otherwise noted, magnet working load limits are stated up to 50% of the actual value. These magnets may reach substantially higher holding values, but the surface condition of the part may affect the magnet's performance capabilities.

Working Load Limit (de-rating) values are then determined by taking this maximum lifting value and dividing it by the manufacturer's design factor. Design factors are minimum 2:1 and most cases 3:1. This means a magnet with a 3:1 design factor and labeled with a working load limit of 1,000 lbs will have a break-a-way force minimum of 3,000 lbs. The labeled WLL is stated for the benefit and safety of the user, due to the fact that ideal conditions rarely exist in the field. The steel that you are lifting may have scale, rust, dirt, or coatings on its surface; or the surface of the magnet itself may be worn. Any of these conditions will cause lower lifting values. Pick a lift magnet that has a WLL value slightly higher than the weight of your part.

ASME B30.20 LIFTING STANDARDS & ASME BTH-1 DESIGN STANDARD

The American Society of Mechanical Engineers (ASME) has established standards for Below-the-Hook Lifting Devices. These standards apply to the marking, construction, installation, inspection, testing, maintenance, and operation of all lifting magnets when used for single or multiple steel piece handling operations in which the operator of the lifting magnet is required to manually position the lifting magnet on the load & manually guide the load during its movement, or in close proximity to people.

Lifting devices designed to these Standards shall comply with ASME B30.20, Below-the-Hook Lifting Devices. Designed and manufactured to ASME BTH-1 Standard.

Industrial Magnetics, Inc. offers several lift magnet options that conform to the ASME B30.20 Standards

POWER GRIP

Our Power Grip Plus sports a light-weight, non-conductive nylon handle and has an easy, side-roll release feature. It's available in three different types of magnetic material for a variety of affordable options based on magnetic strength and/or heat tolerance.

FEATURES:

- » Effective holding against shear force
- » Securely grips heavy parts
- » Maximum Temp. 300°F (148°C)

Lift - Ibs (kg)	Ht. (in)	Wd. (in)	Ln. (in)	Poles	Wt. (Ibs)	Model No.

MAGNETIC TRIGGERLIFT[®]

Hand held lift allows strong grip of parts with an easy to use trigger release. The new molded plastic design provide better ergonomics and easier release.

FEATURES:

- » Retrieve hot parts from Cutting tables
- » One handed operation
- » Permanent magnet
- » Move parts faster and easier
- » Plastic injection molded body and trigger
- » Maximum Temp. 300°F (148°C)

CUTTING TABLE TOOLS & RETRIEVERS

LOAD CONTROL MAGNET

Stay safe. This extremely powerful On/Off Permanent Rare Earth magnet lets you guide loads into position without being in close proximity. Attach the On/Off permanent magnet to a corner or along the side of your load. As the load is lifted, the Load Control Magnet's articulating connection to the lightweight telescoping pole allows you to control and position the load exactly where you want without endangering yourself, others or expensive equipment, should your lifting device fail.

FEATURES:

- » Powerful On/Off Rare Earth Magnet
- » Buy the magnet separately, use your own pole
- » Works on Flat and Pipe
- » Pole telescopes from 6' to 12'

Hold - Ibs (kg)	Pole Included	Length (in)	Extended Length (in)	Weight (lbs)	Model No.

LIFTING ACCESSORIES

WELD-ON PADEYES

Engineered and certified to meet all ASME BTH-1 categories and classes. Eliminate the need and time to engineer, fabricate, machine and certify lifting padeyes. By purchasing these one-of-a-kind padeyes, you can have them on the shelf ready to weld and speed up delivery, testing and approval of your projects.

FEATURES:

- » Hole is reamed to fit shackle pin/bolt ± 0.01"
- » Weldable A36 Carbon Steel
- » Weld Spec and Weld Line on Padeye
- » Date Coded
- » Engineered and Certified

COMPACT LID REMOVER

Magnetic lid remover offers a lightweight and compact, one-piece design that is easy to use, store and transport. Harnessing the forces of magnetism and leverage, users can remove and replace manhole lids up to 450 lbs.

To operate, remove the protective guard from the magnet, and carefully place the unit on the edge of the manhole cover. Make sure the leverage bar is on a solid surface (road). Push down on the handle to raise the lid from the manhole and pull backwards to clear the lid from the hole. The magnet is freed from the lid by moving the handle over the magnets in the opposite direction.

FEATURES:

- » Powerful Rare Earth Magnets
- » Durable Stainless/Aluminum Construction with Rubber Grip T-Handle
- » Magnet storage guard when not in use

DescriptionWt. (lbs)Model No.One-Piece, T-Handle, Two Magnets, 36" Tall, 12" Wide25MCL450

ON/OFF MAGNETIC UTILITY LIFTER

Stop bending over to lift and remove cast iron utility and valve box covers! Also lifts pipes and other steel items. Reduce finger and toe injuries with this lightweight deep reach switchable permanent magnetic lifter. The magnetic field penetrates textured surfaces of lids and allows the operator to ergonomically lift the casting out of the way. This Magnetic Utility Lifter has a locking On/Off handle for safety

and makes removing covers quick and easy.

MANHOLE COVER LIFT PRODUCTS

MANHOLE COVER LIFT DOLLY SYSTEM, MANHOLE COVER LIFT SYSTEM

Easily move heavy manhole covers up to 400 lbs. without worrying about your fingers, toes and back. This cover lift system uses a unique adjustable four-position hook with a four-length retractable handle for terrific leverage, even in tight spots. The three angle positions (90°, 105° and 120°) let you adjust the system for any lifting situation. The safety latch hook makes grabbing the magnet or spreader bar a one-person job. Choose from steel or aluminum manhole dollies. Dollies include your choice of heavy-duty 6", 10" or 12" diameter wheels. The dolly folds up and handle breaks down for easy storage. When fully extended, the handle length is 64"; when folded and collapsed down it is 41" long.

Reduce lost time injuries caused by handling covers

Minimize stress & strain on your body-system does the heavy work for you Retractable four-length handle gives maximum leverage from any angle Ideal for survey crews, handle breaks down for easy storage & transportation Makes moving covers fast, easy and a one-person operation

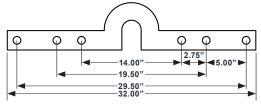

Several magnet and hook configurations

are available for use with your dolly

Use each dolly with either a single magnet in the center of the manhole cover, or with two magnets and a spreader bar (magnets and spreader bar sold separately). When using two magnets on a spreader bar, the load is more balanced-ideal for large covers or heavily textured surfaces. The spreader bar has three location holes so you can place the magnets where you gain the best magnet-to-steel-ratio. A sample of common On/Off Locking Rare Earth magnet choices are listed in the table below. Contact us to for more information on other magnet options.

The optional cover lift Dolly Extension Hook lets you lift very large diameter manhole covers that might otherwise interfere with proper dolly operation. Use on covers up to 54" for 6" wheeled dollies, 50" for 10" wheeled dollies or 48" for 12" wheeled dollies.

MAG-MATE® MANHOLE COVER LIFT PRODUCTS

HD MANHOLE COVER LIFT SYSTEM

The Heavy Duty (HD) manhole cover lift dolly and Magnet & Dolly Combination system take several key features of our regular manhole cover lift system and adds an extra telescoping handle, giving you more leverage when lifting manhole covers.

POWERARM[™] - VEHICLE MOUNTED

The Manhole PowerArm[™] makes lifting and replacing manhole covers the most ergonomic. Great for repetitive access like survey/cleaning crews. Electric Hoist: drive within 3 feet of the center of the lid and let the "Arm" adjust to your location. This "Arm" has a 3-foot, 180° swing radius that allows the positioning of the magnet to the center of the manhole cover. Manual Hoist: Use backup camera to get as close to center as possible. Both "Arms" have 400 lbs. lifting capacity, fit into a standard 2" square receiver hitch and are constructed of welded tubular steel. (Rare Earth Magnet sold separately). Use PowerArm[™] to lower items such as camera tractors, large sewer nozzles, pipe plugs, etc.

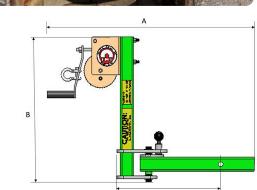

ELECTRIC HOIST SPECIFICATIONS:

- » 55 AMP, 12 VDC with power-up & power-down control, removable
- » 16' remote control cord and a 20' galvanized cable with latch hook
- » Provided with a 2-Pole DC power connector, heavy-gauge 13' long lead to connect hoist to vehicle battery (+) positive terminal and 6' long ground cable to connect to vehicle frame

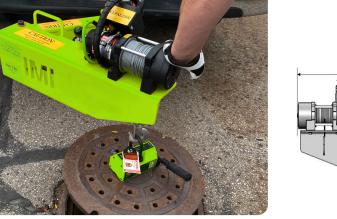

MANUAL HOIST SPECIFICATIONS:

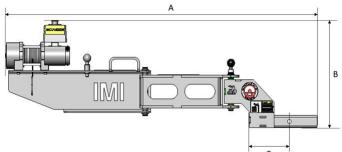

- » Worm Gear hoist that will hold load when handle is released
- » Polyester strap with Zinc-plated hook & safety latch
- » Remove hoist, insert sideways for tailgate access, storage, and travel

ROAD/TOWABLE ELECTROMAGNETIC SWEEPERS

A towable electromagnetic sweeper design that is supplied with wheels, pneumatic tires, adjustable towbar, and parking stand. Stand folds up into the towbar when not in use. All units can be supplied with a heavy duty 115volt AC generator mounted to the top. Generators are powered by a 4 stroke OHV gasoline engine and are energized and de-energized using the 115 VAC "ON" – "OFF" switch on the generator. A remote switch on 20ft of cable is available upon request.

WORKHOLDING CHUCKS FOR GRINDING & MILLING

PERMANENT MAGNETIC CHUCK - GRINDING

Walker's permanent magnetic chucks are manually operated. Made with powerful permanent rare earth (NEO) magnet materials, these chucks can hold a wide range of work-pieces without transferring heat into the material. These chucks allows for holding work-pieces during both surface grinding, as well as light milling. EDM is also possible.

NEOMAX[™] PERMANENT MAGNETIC CHUCK - GRINDING

The NeoMax[™] chuck is a high powered, rare earth permanent magnetic chuck. This model is an extremely versatile magnetic chuck that can be used for grinding, sinker edm and light milling applications.

FEATURES:

Solid steel/Stainless steel fine pole top plate

- » Steel body milled on all sides
- » Powerful Neodymium magnet material
- » One backrest and one end stop for use on two adjacent sides are included with hardware
- » Allen key for actuation and 2 clamps included
- » Uniform holding power

Face Size (in) AxB	Face Ht. (in) C	Overall Wd. (in) D	Overall Lg. (in) E	Weight (Ibs)	Model No.

The NEOMICRO (Micropitch) Permanent Magnetic Chucks offer superior holding and positioning accuracy for precision grinding applications. Designed to reliably hold a large range of work-piece sizes, from very small and thin up to large items.

FEATURES:

- » Unique actuating mechanism eliminates switching deformation
- » Uniform magnet force distribution over entire working area
- » Specially designed magnetic circuit generates 30% higher holding force compared to other micropitch chucks
- » Very low residual magnetic field allowing for easy removal of grinding swarf
- » Low height allowing maximum wheelhead clearance and ability to use the Neomicro on top of another chuck
- » Backrest and end stop on two adjacent sides
- » Allen key for actuation and 2 clamps included

WORKHOLDING CHUCKS FOR GRINDING & MILLING

NEOMILL PERMANENT MAGNETIC CHUCK - MILLING

Neomill Permanent Magnetic Chuck for milling. These permanent magnetic chucks are designed using Neodymium magnets for milling applications. The dual Neodymium magnet pack generates an exceptionally high holding force on workpieces with an uneven or rough contact surface.

FEATURES:

- » Low magnetic field, concentrated near the top plate surface to reduce chip contamination of the work-piece & cutting tool
- » Transverse, close pole division of 11 mm of steel and 4mm of brass allows optimal holding of work-pieces only 26 mm long and 6 mm thick (Usable top plate life: 5 mm)
- » Nominal holding force 120 N/cm2
- » Allen key for actuation and 2 clamps included
- » The top plate can be drilled and tapped to accommodate pins, pegs or other clamping aids.

RECTANGULAR ELECTROMAGNETIC CHUCKS LOW-PROFILE ELECTROMAGNETIC CHUCK - GRINDING

Fine division Long Bar Pole electromagnetic chuck ideal for surface grinding small to medium parts.

FEATURES:

- » Maximum workholding surface
- » Fine pole division for more uniform magnetic holding of small parts
- » Lowest height for maximum clearance
- » Solid brazed construction top plate protects coil from penetration of coolant; provides stronger, more stable work surface.
- The LBP is an extremely versatile chuck. Its variable holding power permits easy flat grinding (without shimming) or workpieces that do not have one true surface.
- The magnetic surface pattern allows for simple and inexpensive tooling designs to hold intricate shaped workpieces.
- » Suitable for EDM applications

CUSTOM CHUCK OPTIONS ELECTROMAGNETIC & ELECTROPERM - GRINDING & LIGHT MILLING

With years of experience in recommending the right chuck design for your application, chucks can be custom designed and specified when a standard chuck does not meet the needs of your application. Many tines the application can call for unique pole designs and configurations. We can help select the right match for your application for a turn-key solution in many electromagnetic and electro-permanent chuck configurations and sizes. These can be designed to integrate into existing systems to replace old chucks or improve clamping performance. Chuck controls can also be provided and engineered to meet the exact needs of your processes.

RP RADIAL POLE ROTARY ELECTRO CHUCK

Rotary Electromagnetic Chucks are made in radial pole multi-coil design for use in hard turning and free state grinding. The radial pole design is recommended for holding circular workpieces such as rings and discs. Most radial pole chucks come with t-slots, but tapped holes are also available for mounting tooling. The smaller chucks have four or six poles, while the larger

chucks have ten or twelve poles.

ELECTROMAGNETIC MAGNETIC CHUCK CONTROLS SMART-D SERIES

The Smart-D Series is wall or cabinet mounted automatic release chuck control system for electromagnetic chucks.

FEATURES:

- » Full, variable & residual holding power
- » Input Voltages: 208/230/240/380/440/480 VAC (50/60 Hz.)
- » Specify AC Voltage when ordering

OPTIONS:

- » Touchpad Controls for some or all control functions
- » Automatic release to ensure workpieces releases based on machine input signal

SCV - MANUAL RELEASE FOR MACHINE MOUNTING

Manual release chuck control with Variable holding 115 VAC input with 0-110 VDC output.

Specifications					
Model	Watts	Net Weight (Ibs)			
SCV-1.5	150	8			

SMART-B SERIES - AUTOMATED RELEASE CONTROL

Automatic Release Controls for machine mounting. Smart controls are designed to be used with electromagnetic chucks, with an input of 115 VAC, output 0-110 VDC.

FEATURES:

- » Touchpad control allows easy selection of full, residual, variable and release positions
- » Automatic release cycle assures workpiece release, while freeing machine operators from manual demagnetizing operations

MAGNETIC CLAMPING BLOCKS

MAGNETIC CLAMPING BLOCKS

MBX Magnetic Clamping Blocks have opposite clamping sides when turned ON. Designed to clamp workpieces to steel surfaces, such as machinery or worktables. Ideal for applications such as welding, deburring, tapping or machining operations. With two different shaped clamping surfaces, almost any workpiece geometry can be held such as: flat, round, square or custom profiles. Clamps allow machining on 5-sides, reducing the number of operations.

FEATURES:

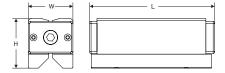

- » Powerful ON/OFF Permanent 2-sided Magnet
- » Holds Flats, Round, Square Workpiece Geometry
- » 90° swing ON/OFF Activation
- » Nickel-plated Housing
- » 3rd Clamping Side for Vertical Holding
- » Turns ON/OFF on Either End
- » Use Hex Rod to Join Two Clamps (not included)
- » Sold in Pairs

Fully nickel-plated housing

MAGNETIC VIEWING FILM

This film allows you to identify the magnetic field patterns of

magnetic materials and assemblies. The viewing film can be used to check for damage to the magnet material within most types of magnet assemblies. Simply hold the film against the surface of any magnet and the pattern of the magnetic field is revealed. The 3" square sheets are reusable.

Model No. XX0044

MAGNETIC POLE TESTER

Magnetic Pole Tester for checking for the presence of magnetic fields. Perfect for Coil testing, Polarity checks, Electric motor assembly, error analysis, quality control & more. Sensitivity: ±15 mT on/off hysteresis. Operating temperature range: 0°C to +50°C. Battery: 4 x 1.5V button cell, LR44 is included.

WHITE MAGNETIC SHEETING

Use in your office, manufacturing, air vent covers or inventory for labeling applications or advertising. Measures 1/32" thick and is 24-3/8" wide. Available in 3 lengths. CEATUDES.

 FEATURES: Can be cut, drilled or shaped 	Hold - Ibs (kg) per square foot	Length (ft)	Weight (Ibs)	Model No.	
» Conforms to any contour	85.0 (38.55)	1	1.15	MRS030X2437X001	
» Can be written on	85.0 (38.55)	10	13	MRS030X2437X010	
	85.0 (38.55)	25	31	MRS030X2437X025	

CERAMIC MAGNET MATERIAL

Ceramic magnets are a low cost, high energy material. It is a non-metallic, non-conductive, hard, brittle material compound that can only be cut with a diamond wheel.

CERAMIC FEATURES:

- » Performs best at temperatures below 480°F (249°C)
- » Difficult to grind or drill, cannot be machined utilizing EDM
- » Tolerance ±2% on 0.D., Length & Width. ±.005" on Thickness
- » This material is magnetized through the thickness

RAW MAGNET MATERIAL - RARE EARTH

RARE EARTH MAGNET MATERIAL

Rare Earth Neodymium-Iron-Boron (NdFeB) magnets are the highest magnetic strength of any magnet material, high resistance to demagnetization and is ideal for applications requiring maximum strength in a limited area. Rare Earth magnets are usually coated or plated to prevent oxidization.

- » Operates best at temperatures below 180°F (82°C)
- » Tolerance ±0.005" on all dimensions

NOTE: Avoid grinding, as flash fires may occur from rare earth material dust particles. Crystalline structured material is easily chipped, cracked or broken.

CS = Counter Sunk Magnet Material. Screw size is specified in the "CS" column.

MULTI-POLE ENCODED MAGNETS

MAX-ATTACH® - SMARTMAG® ENCODED MAGNET MATERIAL

Max-Attach® SmartMag® magnets are Rare Earth Neodymium-Iron-Boron multi-pole encoded magnets that contain small magnetic poles encoded into a single face of raw magnet material to produce superior attachment force that cannot be achieved with conventionally magnetized magnet material. Maximum temperature is 180°F (82°C). They cannot be machined.

Some models available with 3M VHB (Very High Bond) adhesive backing for placement on nonferrous surfaces.

MAG-MATE®

SMARTMAG® ALIGNMENT ENCODED MAGNET MATERIAL

SmartMag® alignment magnets are multi-pole encoded magnets that contain small magnetic poles encoded into a single face of raw magnet material to create alignment patterns that can produce complex precision alignment that has not been achieved with conventionally magnetized magnet material. Maximum temperature is 180°F (82°C). They cannot be machined. Some models available with 3M VHB (Very High Bond) adhesive backing for placement on non-ferrous surfaces.

Twist-Latch:

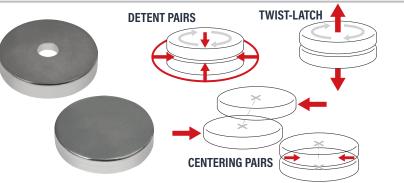

Twist-Latch SmartMags® will repel until they rotate through the zero-force transition point where they will attract and attach. They have an alignment pattern that will repel or release the magnets when one magnet is rotated into a specific release orientation.

Detent:

Detent SmartMags® will align at specific angles when rotated and hold its position until enough force is applied to rotate one magnet into the next position.

Centering:

Centering SmartMags® are a distinct type of Alignment SmartMag® that are produced in matching pairs and will align along a set axis.

CYLINDRICAL FIXTURE MAGNET ASSEMBLIES

JØV

CYLINDRICAL FIXTURE ASSEMBLIES

A1: Rare Earth Neodymium 1-Pole magnet in an Aluminum insulated cup. Powerful compact magnet that can be press fit or use tapped hole for mounting. +/-.003" diameter & .015" length. Maximum temperature 180°F (82°C).

A2: Max-Attach' Rare Earth Neodymium in an Aluminum insulated cup. Multi-pole compact magnet that can be press fit or use tapped hole for mounting. +/- .003" diameter & .015" length. Maximum temperature 180°F (82°C).

B: Rare Earth 3-Pole magnet in an Aluminum insulated cup. Extended poles can be lightly machined. Can be press fit or use tapped hole for mounting. +/-.003" diameter & .015" length. Maximum temperature 180°F (82°C).

C: Rare Earth Neodymium 4-Pole magnet in an Aluminum insulated cup. Extended poles can be lightly machined. Can be press fit or use thru-hole for mounting. +/- .008" diameter & +/- .015" length. Maximum temperature 180°F (82°C).

D: Rare Earth Neodymium 3-Pole magnet in an Aluminum insulated cup. Maximum strength in a compact package. Can be press fit or use thru-holes for mounting. +/-.008" dia. & +/-.015" length. Maximum temperature 180°F (82°C). Mounting hole center 1-13/16".
E: Rare Earth Neodymium Island 2-Pole magnet in a steel cup. Ideal for shallow fixtures. Can not be press fit without additional insulation. Use tapped hole for mounting. +/-.005" dia. & +/-.015" length. Maximum temperature 180°F (82°C).

F: Rare Earth Neodymium parallel 2-Pole magnet in an Aluminum insulated cup. Flush face magnet, can be press fit or use tapped hole for mounting. +/- .008" diameter & +/- .015" length. Maximum temperature 180°F (82°C).

G: Rare Earth Neodymium parallel 2-Pole magnet in a brass insulated cup. Ideal for metric press fit applications. +/- .002" diameter & length. Maximum temperature 180°F (82°C).

H: Rare Earth Samarium Cobalt parallel 2-Pole magnet in a brass insulated cup. Ideal for high heat metric press fit applications. +/- .002 diameter & length. Maximum temperature 392°F (200°C).

I: Alnico Island 2-Pole magnet in a steel cup. Especially effective in mold applications. Can not be press fit without additional insulation. Use tapped hole for mounting. +/-.005'' diameter & +/-.015'' length. Maximum temperature 800°F (427°C).

J: Alnico magnet material shielded in a non-conductive sleeve, 1-Pole on each end.

Insulator prevents loss of magnetic flux when inserted into steel components or fixtures. No mounting holes. +/-.001" diameter & +/- .005" length. Maximum temperature 800° F (427°C).

K: Rare Earth Neodymium magnet material shielded in a non-conductive sleeve, 1-Pole on each end. Insulator prevents loss of magnetic flux when inserted into steel components or fixtures. No mounting holes. +/- .001 diameter & +/- .005" length. Maximum temperature 180°F (82°C).

L: Alnico Multi-Pole magnet in an Aluminum insulated cup. Very effective on thin metal or difficult applications. Counter sunk mounting hole for easy installation. +/- .006" diameter & +/- .015" length. Maximum temperature 300°F (148°C).

M: Samarium Cobalt, Island 2-Pole magnet in a steel cup. Effective in mold applications. Cannot be press fit without additional insulation. Use tapped hole for mounting. +/- .005" 0.D. & +/- .015" length. Maximum temperature 392°F (200°C).

- A. A1: Ceramic magnet, 2-Pole assembly molded in a black plastic body. Effective for holding heavy parts and holding against shear forces. Supplied with mounting holes on either end of the magnet on either end of the magnet. Maximum temperature 300°F (148°C). USA M.A.D.E.™
 A2: Rare Earth magnet material, 2-Pole assembly molded in a grey plastic body. Effective for holding heavy parts and holding against shear forces. Supplied with mounting holes on either end of the magnet on either end of the magnet. Maximum temperature is 180°F (82°C). USA M.A.D.E.™
- B. Rare Earth magnet material, 2 or 3-Pole assembly potted in an aluminum housing. Effective for holding heavy parts and holding against shear forces. Supplied without mounting holes, they can be drilled, tapped, milled, etc. on either end of the magnet. Maximum temperature is 180°F (82°C). USA M.A.D.E.™
- C. Ceramic magnet (except LP2100R is Rare Earth) placed in a 400 Stainless Steel channel covered with 300 stainless steel. Use 1/4"-20 (m6) bolt or screws for mounting this non-corrosive 2-pole assembly. Maximum temperature 300°F (148°C). Rare Earth maximum temperature is 180°F (82°C). USA M.A.D.E.™
- D. Ceramic magnet sandwiched between steel pole pieces. Use 10-32 (m5) bolt or screws for mounting this non-corrosive 2-Pole assembly. Maximum temperature 300°F (148°C).
- E. Paint Rack magnet uses a 400 Stainless Steel channel covered with 300 stainless steel. Use 1/4"-20 (m6) bolt or screws for mounting this noncorrosive 2-Pole assembly. Maximum temperature 350°F (177°C). USA M.A.D.E.™
- F. Two ceramic magnets placed in a 400 Stainless Steel channel covered with 300 Stainless Steel. Center mount using two 1/4" -20 (m6) bolt or screws for mounting this non-corrosive, 2-pole assembly. Maximum temperature 300°F (148°C).
- G. Rare Earth magnet material is sandwiched between steel pole pieces and welded to a stainless steel back plate. This extremely powerful assembly is painted red and fits narrow openings. Use 1/4"-20 (m6) bolt or screws for mounting this 2-Pole assembly. Maximum temperature is 180°F (82°C). USA M.A.D.E.™
- H. Ceramic magnet material is sandwiched between steel pole pieces. All-welded construction with a stainless steel cover. No epoxy, painted black. Can be used for holding and transferring of parts, aligning pieces during welding operations and as the holding elements on paint racks. Use 1/4"-20 (m6) bolt or screws for mounting this 2-Pole assembly. Maximum temperature is 480°F (248°C). USA M.A.D.E.[™]
- Nickel Plated Rare Earth magnet material is glued to a bright plated steel channel. This extremely powerful assembly is ideal for low profile applications that require strong pull pounds. Use 10-32 (m5) bolt or screws for mounting this 2-Pole assembly. Maximum temperature is 180°F (82°C).
- J. Ceramic magnet material placed in a 400 Stainless Steel channel and covered. Exception: MQ1129 is epoxy covered. This full-length magnetic holding force gives generous room for various fastener heads. Use 10-32 (m5) bolt or screws for mounting this non-corrosive 2-Pole assembly. Maximum temperature 300°F (148°C). Prefix LC = USA M.A.D.E[™].

CUP MAGNET ASSEMBLIES PLATED CUP MAGNET ASSEMBLIES

Secure tarps, cables, wires, signs and more to any steel surface, including A overhead beams, ceiling decks, drop ceiling channels and metal joists. These cup magnet assemblies are quickly installed and repositioned. Note: **Ceramic** cup magnets are heat resistant < 300°F (148°C) ± .030° all dimensions. **Rare Earth** cup magnets are heat resistant up to < 180°F (82°C). Cup magnet (base) ±.015″ diameter, ±.010″ thickness, through holes ± .005″.

(82°C). Cup magnet (base) \pm .015" diameter, \pm .010" thickness, through hole **MX0984R** \pm .015" all dimensions.

RUBBER PROTECTION BOOTS FOR CUP BASE MAGNETS

Ideal for protecting painted, plated, polished, etc. surfaces from scratches. Boots also increase resistance to shear forces. Rubber boots fit over the magnetic face of cup magnets. Note: Using a rubber boot on a cup magnet will reduce the magnet's holding power due to air gap. See holding power below.

TWO LINE CLAMPS

Instantly install magnetic clamps on any steel surface. No drilling or other mounting hardware needed. Idea for pneumatic lines, PVC lines and electrical wires. Perfect for holding forklift battery cables and connector in place. Bright plated permanent magnet and black polypropylene holder withstand moisture. Temperature range is -20° to 190°E

TOOL STORAGE HOLDING TRAYS

These Tool Storage Holding Trays are used for holding tools, fasteners, spray cans, tape, etc. to the sides of tool boxes, walls, tables or any area where tools need to be within reach. The Magnetic Mount tray allows you to quickly remove the tray from your toolbox and take it wherever your tools are needed. No need to run back and forth to your toolbox. Most standard size tool boxes will hold two, ST0625 trays, side by side. ST0625M

MAG-MATE® MAGNETS FOR HOLDING & STORAGE CAN/CUP HOLDERS

Hold your can, cup, bottle, lubricant spray, etc. where you want it. Take it with you from one machine to another or anywhere there is a metal surface. Holds well on ferrous metal surfaces, painted or plated surfaces.

FEATURES:

- » Sturdy Stainless Steel holder
- » Holds diameters up to 3-3/8" with or without a handl
- » Available with magnets or through holes

MAGNETIC REVERSIBLE HOOKS

FEATURES:

- » Secures cables, wire, lights, garments and more to any flat steel surface.
- » Magnet can be quickly installed and repositioned.
- » Stainless steel hook can be used in the "open" position for quick access to store product.
- » Move the hook to "closed" position to prevent products from being knocked off.
- » Overall length 4.5"

IMPACT WRENCH/HEAT GUN HOLDER

Ideal for holding heavy impact wrenches, heat guns or any similar shaped tools that need to be kept handy. Powerful permanent magnet holds extremely well on steel surfaces. The thicker the steel the better the hold. **FEATURES:**

- » Powerful Permanent Magnet
- » Sturdy Stainless-Steel Holder
- » Holds diameters up to 3-3/8"
- » Heat resistant up to 300°F (148°C)
- » Lower loop is 2.35" diameter

TOOLS FOR HOLDING & STORAGE

SPRAY CAN RACK HOLDER

These stainless-steel racks are used for organizing and storing spray-paints, lubricants or other small, cylindrical cans right where you need them. Available in horizontal or vertical orientation, each rack holds up to 6 cans and can be ordered with either a magnetic mount or through-hole mounting style. Magnetic versions can be mounted to paint booths, metal storage cabinets, doors, machinery, or shelving and can be easily repositioned when needed. Use the through-hole version to mount to any non-ferrous surface. Vertical-style racks utilize a small magnet in each slot to securely hold the can in place in case of vibration or transport.

ACCESSORY HOOK HOLDER

Accessory hooks/holders are used for many storage needs such as: shovels, brooms, rakes, tools, hammers, etc. Industrial strength, one-piece stainless steel construction, these hooks are available with and without magnets for mounting. Use magnetic versions for mounting to steel surfaces like metal storage cabinets, doors, machinery, beams, etc. Reposition when needed. Use the through holes to mount to any non-ferrous surface.

ON/OFF MAGNETIC TIE-DOWNS

Switchable Magnetic Tie-Downs for holding of tarps, signs, banners, etc. No need to drill, bolt or weld mounting tabs to surfaces. Place magnet on clean steel, push the handle slightly down and rotate 180° to turn magnet "On." Reverse steps to turn magnet "Off."

FEATURES:

- » On/Off Permanent Rare Earth Magnet
- » Locking On/Off Handle
- » 4:1 design factor
- » Performs best when mounted on a clean, smooth, flat, metal surface that is at least 1/4" thick
- » Works on flat and round ferrous surfaces

CLAMP/LOCKING PLIERS RACK

Organize a variety of Clamps and Locking Pliers with this one-piece sturdy rack. This unit organizes your clamping tools with larger slots for larger clamps and small key holed slots for smaller clamps and or locking pliers with the knurled tension adjusters. Works with many sizes and styles of C-Clamps, Flat-Bar Clamps, Welding Clamps and Locking Pliers.

FEATURES:

- » Sturdy all Stainless Steel construction
- » Nine, 0.51" wide slots for larger clamps
- » Four, 0.28" wide slots with 0.55" key hole for smaller clamps
- » Versatile mounting flange with slots and through holes for a variety of mounting options
- » Beveled flange to keep tools from vibrating off if cart or vehicle mounted

BATTERY TOOL STORAGE RACK

Keep your cordless battery tools securely stored and organized with this durable steel rack system. Works with most popular tool brands to store up to 5 tools & includes a shelf for chargers and accessories. Mounting holes and slots for typical 16" center studs and other mounting options. Unique locking bar feature works with your pad locks to prevent theft of valuable tools when used on job sites, in equipment trailers or service vehicles. The bar can also be secured with fasteners or pins to keep tools secure during transport.

FEATURES:

- » Durable formed steel construction with powder-coat finish
- » 5 slots for battery tool storage of impact drivers, drills, grinders and more
- » Shelf for chargers or accessories with cord routing holes
- » Locking bar to keep tools secure from theft or during transport (lock or hardware not included)
- » Slotted mounting holes for easy mounting (hardware not included)
- » Sixteen, ¼" Hex holes between tool slots for storage of hex shaft tools & bits
- » Three, through holes near the front of the shelf for securing magnets or other items to the underside of the shelf with #10 fasteners

TOOLS FOR HOLDING & STORAGE

KEY-SLOT MAGNET

Mount power strips, frames, anything with the key slot with this strong Rare Earth magnet available in two sizes and capacities.

FEATURES:

- » Strong T-Slot studs welded to a steel nickel plated cup for durability
- » Powerful Rare Earth cup magnet to keep your items hanging and secure from most steel surfaces
- » Two sizes available to work with most common sized t-slots found on powerstrips, home electronics, power tool chargers, tool kits, picture frames and more

FOOT/ARM PULLS AS HOOKS

Heavy Duty Storage Hooks!

FEATURES:

- » Formed 12 gauge stainless steel construction
- » Two mounting holes to accept up to ¼" fasteners
- » Tumbled finish
- » Easy to mount to Stud Walls, Beams, Machinery, Trailers and more for storage of heavy items

APPLICATIONS:

- » Hang tool cases for heavier tools like saws, hydraulic ram kits, hammer drills & more
- » Organize heavy cables, hoses, and tubing
- » Horizontal storage of conduit, PVC, pipes, trim and other construction materials

TOOLS FOR HOLDING & STORAGE SMART-LADDER REST [™]

A simple, cost-effective solution for ladder safety compliance. The Smart Ladder Rest™ is your best choice for getting workers on and off the roof safely with confidence. Developed and proven by a commercial roofing contractor for their own workers' safety, the Smart Ladder Rest delivers the safety you need to protect you most valuable assets.

FEATURES:

- » A simple, maintenance-free way to reduce injuries and liability and meet ladder safety compliance requirements
- » OSHA compliant pursuant to regulations 1910.23 and 1926.1053(B)(1).
- » Easy, low-cost installation on flat or pitched roofs.
- » Field Tested and proven to provide excellent ladder security.
- » Durable, corrosion resistant, ¼" stainless steel formed construction
- » Can't be used for unauthorized access to the roof, unlike permanent ladder systems
- » Show employees you're committed to their safety by providing a stable, secure ladder fall-prevention system

BENEFITS:

- » Prevents portable ladders from moving from side to side.
- » Prevents portable ladders from sliding away from the building.
- » Protects gutters and edge metal from ladders
- » Can be flashed in to provide a water tight roof.

COAT HOOK HOLDERS

Referred to as "coat" hooks, these holders are used for many storage needs such as: coats/jackets, lanyards, key chains, umbrellas, etc. Sturdy stainless steel construction, these coat hooks are available with and without magnets for mounting. Use magnetic versions for mounting to steel surfaces like cabinets, doors, machinery, beams, etc. Use the through holes to mount to any non-ferrous surface.

FEATURES:

- » Sturdy one-piece Stainless Steel construction
- » Offset hooks on 3 & 5 hook models for easy use
- » Powerful permanent magnets on models ending with "M"

STAINLESS STEEL INSPECTION MIRRORS

Stainless Steel Mirrors are ideal for use in critical areas where foreign objects cannot be left behind. FOD (Foreign Object Debris) free. No worries about glass mirrors breaking in sensitive areas such as engines, fuel lines and machinery. Great for high heat areas. Telescoping shafts and nonslip, solvent resistant grips on all except IMS103 & IMS105 that have Knurled Handles & bendable shafts. IMS103, IMS105 & IMS234 are non-framed and can be used in liquid/solvent applications.

READ RITE[™] INSPECTION MIRROR

The Read Rite[™] Inspection Mirror shows the numbers, letters and more as they would appear if they were visually accessible by the eve (non-inverted), eliminating deciphering or transcription errors and providing the utmost accuracy in observation. Using a typical inspection mirror to read important numbers can lead to uncertainty or inaccuracy due to the inverted appearance of the image.

- » Stainless Steel Mirror No glass to break
- » Dual-sided: Read Rite[™] mirror on one side, regular inspection mirror on the other side
- » Telescoping Hex rod shaft prevents mirror from swinging while in use
- » Double Ball Hinge with adjustable tension, 360° rotation

POCKET TOOLS & RETRIEVERS

E

Ideal for reaching behind, underneath or around machinery and/or difficult to reach areas. The Fixed Shaft and Telescoping Shaft Magnetic Retrievers feature several Magnet Head styles that include the Fixed Head, Single Ball Swivel Head and the Double Ball Swivel Hinge Head that allow for more control and functionality. Powerful Rare Earth magnet material, except where noted. All Rare Earth tools have a maximum temperature of 180°F (82°C).

AUTOMOTIVE & APPLIANCE TOOLS

SPARK PLUG BOOT PLIERS

Insulated spark plug boot pliers grip boot to prevent wire damage, electrical shock and burns.

FEATURES:

- » Pliers handle and jaws are coated with a 90 durometer heavy-duty plastic for a sure grip
- » PLS140 is ideal for use against the fire wall and on minivans
- » PLS100S contains one of each pair of pliers. Be ready for any difficult to reach boot.

HOSE CLAMP PLIERS

Swivel jaws are slotted for positive holding/removal of plastic and or metal constant tension hose clamps. Jaws rotate 360° to grip at any angle and can be locked in three holding positions, freeing up hands.

FEATURES:

- » Quick clean vinyl grip
- » Finger tip locking pawl
- » PLC200 is for use on Ford, GM, Chrysler, VW and other import vehicles for constant tension/Mobea (flat band) clamps
- » PLC210 is for use on vintage automotive and agricultural vehicles, appliances, irrigation/ spraying systems, or Corbin (single wire) clamps
- » PLC220 has universal tips, right or left facing clamp for constant tension Mobea clamps

WELDING ANGLES & CLAMPING DEVICES

MAG90[™] ON/OFF MAGNETIC SQUARES

On/Off Switchable Permanent Rare Earth Magnetic Squares are extremely powerful and eliminate the need for tedious clamping. The Mag90[™] squares offer fast work-holding on multiple sides for flat or round steel. Features pre-tapped holes on all sides for mounting and a locking On/Off handle for safety.

ON/OFF MAGNETIC WELDING ANGLES

On/Off Switchable, Permanent Rare Earth Magnetic Welding Angles. Welders set up, weld and quickly move on to the next project. Simply place on work surface, turn on and start welding. On/ Off magnets easily allows debris to fall away. Can be used on flat or round steel or cast iron. Nonmarring hold. Stainless steel construction.

FEATURES:

- » WSP0150R pivots to angles ranging from 22° to 270° with locking handle and detents. Hold on 3 sides.
- » WSF0150R & WSF0450R have slots allowing for guick-slide adjustment or addition of more magnetic bases. Reversible for inside or outside hold.
- » WSF275X3 ON/OFF holds 3 sides.

BUTT WELD MAGNETIC CLAMP SET

Unlike other butt weld clamps, these clamps utilize two powerful Rare Earth magnets to securely hold work pieces during setting up. Magnetic feet swivel for curved surface. Ideal for automotive body panel repairs, tanks/containers, or flat welding. Standard 1/4" clamp bar is replaceable with custom bars to match contours.

FEATURES:

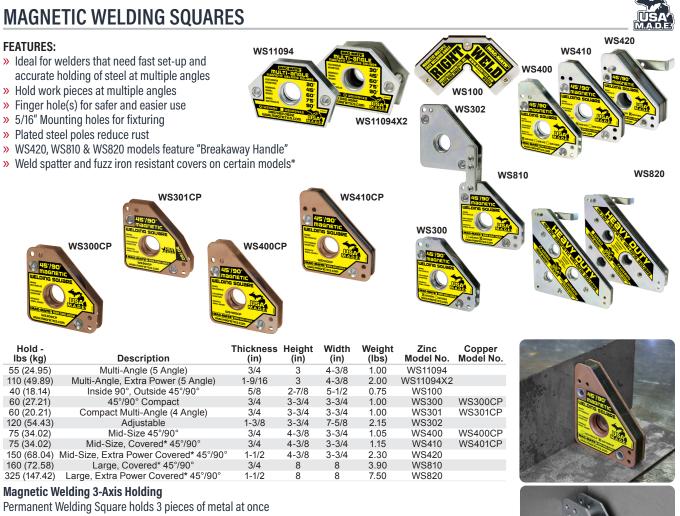

- » Gap between panels, 0.03"
- » Works with materials up to 3/8" thick
- » Sold in set of 2 clamps

MULTI-POSITIONING MAGNETIC V-PAD CLAMPS

One of the best tools a welder could have. These magnetic V pads hold steel in almost any angle. Each clamp has a pivoting pad at each end to hold workpiece at angles up to 180°.

- » Powerful Rare Earth Magnets
- » Each Pad contains 4 magnets
- » Great for holding round stock

WELDING HOLDERS DEVICES

SQUARE BUDDIES

Square buddies are a unique and innovative tool designed to greatly improve the accuracy and quality of pipe fabrication by simply using a common framing square and enabling it to be used easily and efficiently on pipe. This magnetic base set allows a pipe fitter to use the square independently, hands free to perform precise measurements.

- » Provides a hands-free, level framing square base for Pipe and Tube Fabrication
- » Improves accuracy of square weldments when fitting and steel welding pipe or tube
- » Reduces set-up time and allows for hands-free measurements
- » Powerful magnets hold the square steel pipes or tubes in any orientation
- » Adjustable magnet positions for pipes from 2" 0.D. up to 12" 0.D.
- » Thumb Screws allow for quick set up and firm holding of your framing square
- » Sold as a pair, magnets and hardware included

Overall Length (in	Height Range) (in)	Width Range (in)	Weight (lbs)	Model No.

GRINDER TOOL HOLDERS

Keep your grinder handy on top or side of steel work benches. Two attachment options available with screws or magnets. Powerful permanent magnet holds up to 6" diameter grinder wheels in horizontal or vertical positions, regardless of trigger location.

FEATURES:

- » Sturdy stainless steel holder
- » Keep grinder protected and close by
- » Magnetic base option allows for quick placement and repositioning

PRESS BREAK & JIG TOOLS

MAGNETIC SQUARING ARM - PRESS BRAKES

Set-up a variety of bends faster and more accurately. The Magnetic Squaring Arm for Press Brakes features an adjustable arm that locks into place for easy, repeatable part positioning. The sturdy platform and a magnetic arm also helps to support and hold parts, keeping operators fingers clear of the press.

FEATURES:

- » Powerful Rare Earth Magnets hold Squaring Arm tight to die surface
- » Arm swings and locks from 90° to 20° in two directions allowing for 140° in set-up adjustment
- » Adjustable handle secures arm at proper angle and moves out of the way
- » Locator rule on leading edge helps locate squaring arm
- » Stainless Steel/Aluminum construction
- » Safety strap prevents squaring arm from falling off if accidentally knocked off die

Hold - Ibs (kg)	Height (in)	Width (in)	Length (in)	Weight (Ibs)	Model No.

MAGNETIC SQUARING ARM - SHEARS

FEATURES:

- » Increase shear blade life by utilizing the entire blade length
- » Quickly set-up consistent angle cuts on your shear
- » Powerful On/Off rare earth magnets allow for fast installation
- » For extra strength, an additional magnet can be added in the center
- » On short shear beds one magnet can be moved to the center for a positive hold
- » Stainless Steel construction

4-IN-1, "MULTIPLE-JAW" DEEP REACH CLAMPS

Each deep-reaching, Multiple-Jaw clamp offers four clamping options to accommodate the different surfaces of your work pieces: flat, pipe, angled or non-marring. Simply rotate the clamp's jaws to match the surface style of your part. The polyurethane grip option can be used on polished or painted metals, wood, plastic, aluminum, or any soft material.

CANTILEVER CLAMPS

DEEP REACH WELDING GROUND CLAMP

FEATURES:

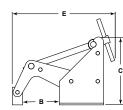

- » Dual-purpose workpiece clamp and welding ground
- » Contains a 400 AMP weld ground connection
- » No-twist clamp secures workpiece without twisting or "walk-off-center"
- » Copper plated clamp prevents weld spatter from sticking
- » Clamp jaws are beveled to hold both flat or round surfaces
- » Deep reach jaw allows for deep clamping of material

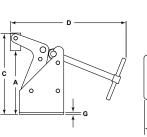

QUICK-ACTING HOLD DOWN CLAMPS ALSO WITH NO-MAR® PADS

FEATURES:

- » Quick Acting Hold Down Clamp
- » More clamping power than ordinary Toggle Clamps
- » Ideal for Drill Presses and Machining Centers
- » Best for holding where thickness and surface are not exact from part to part
- » Spring tension jaw moves quickly out of the way
- » USA M.A.D.E™

MAG-MATE® LATCHES, BUMPERS & DOOR HOLDERS/STOPS

MAGNETIC DOOR LATCHES

These extremely powerful Rare Earth magnetic latches have a very thin profile. Ideal for door & cabinet applications or for mounting panels, signs, pictures, etc. Plated magnet, washers and screws reduce corrosion. Washers are recessed to allow the screw head to set below the contact area.

FEATURES:

- » ML050 uses 3M VHB Adhesive on the magnet
- » Screw(s) included are #6 x 5/8" long

Powerful Rare Earth magnetic connection systems can be used to hold doors & cabinets in the open position or to attach key rings, knives & tools in both indoor and outdoor applications. Ideal for workshops, home, office, garage, RV or marine settings. Magnets are embedded inside a non-marring housing and come with several different mounting options, including adhesive, screws or rivets.

MAGNETIC CONNECTORS:

- » ABS plastic housing
- » 3M adhesive backing

TRAILER/WALL MOUNT MODELS:

- » Non-marring EPDM* rubber housing
- » Mounting screws included

FLOOR MOUNT MODELS:

- » Non-marring EPDM* rubber housing
- » Powder coated steel floor bracket
- » Mounting screws included 1" L #10 Self-Tapping

HANDS-FREE FOOT & ARM PULLS FOR DOORS

FOOT OPERATED, HANDS-FREE DOOR OPENERS

This hands-free device lets you pull open latch-less doors using the sole of your shoe. Reducing the need to touch common surfaces and can help slow the spread of germs and bacteria. Perfect for restrooms and other swing-style doors. Prevents shoe damage and can be used with open toe shoes. Available with either magnetic mount for metal doors, which attaches in seconds and can be repositioned to the perfect spot, or direct through-hole mount for non-metal doors. Available in high-vis yellow (HVY).

FEATURES:

- » Heavy duty, one piece, stainless steel formed construction
- » Indoors or Outdoors

ARM OPERATED, HANDS-FREE DOOR OPENERS

This hands-free device lets you pull open latch-less doors using your forearm, wrist or elbow - so users don't have to touch common surfaces to help reduce the spread of germs and bacteria. Perfect for public restrooms and other swing-style doors. Available with either magnetic mount for metal doors, which attaches in seconds, or direct through-hole mount for non-metal doors. Mount approximately 40-45" from the floor. For hollow core doors, use through bolts.

FEATURES:

- » Heavy duty, one piece, stainless steel formed construction.
- » Position Arm Pull either pointing up, down or sideways.
- » Indoors or Outdoors

FOR LATCHED DOORS - HANDS-FREE DOOR OPENER

The J-Hook can be used to hold the door handle in the open position - converting it into a latchless-style door that can be used with the Foot or Arm Pull. The J-Hook attaches directly to steel doors. For non-steel doors, use our MX0870 Magnetic-Stainless Disk that you can mount to your door.

Universal J-Hook Magnet

MX2000JH

FLEXIBLE FLASHLIGHT HOLDER

When you need to use both hands and there is nobody to hold a light for you, these magnetic based flexible flashlight holders will come to the rescue. Strong magnetic hold is easily repositioned. Flexible neck lets you pinpoint the light right where you need it. MX25FLVB02 fits typical Mag-Lite® flashlights. Flashlights not included.

MAG-MAID COOLANT CLEAN OUT TOOL

This powerful Rare Earth clean-up tool safely removes metal chips and debris from machinery and work areas. The large comfortable handle is attached to Rare Earth magnets inside the seam-welded, stainless steel tube. To clean this tool, pull the handle away from the stainless steel tube. Collected scrap metal will follow the magnet up the tube until it hits the stripper washer. Once the magnet is past the stripper washer, the magnetic influence will dissipate and the metal falls off. No need to pull or wipe off collected metal.

FEATURES:

- » Maximum temperature 180°F (82°C)
- » Seam-welded, .053" thick tube prevents denting
- » Large grip handle

CONTINUOUS DUTY SURFACE TYPE DEMAGNETIZERS

Surface Type Demagnetizers are designed for stationary or portable use, providing continuous duty operation as work pieces pass the demagnetizer's face plate. This design allows for installation under, over or alongside conveyors for demagnetizing applications.

FEATURES:

- » Durable, one-piece face plate
- » On/Off switch
- » Portable and/or stationary design
- » Integrated side handles for hand held operation
- » AC On Indicator (DSC423 Only)

Note: 10 ft. cord with grounded plug on 120 VAC models only. 240 VAC models have a 6 ft. three wire cord without plug.

ELECTROMAGNETS & COUNTER WHEELS

ELECTROMAGNETS AND POWER SUPPLY

Electromagnets offer On/Off capability through the application of controlled DC electrical current, controlled holding power and on-command release of ferrous steel parts. Most electromagnets require specially designed power supplies to achieve optimum magnetic performance. IMI offers power supplies for all of your electromagnet applications. Continuous duty 158°F (70°C) to 192°F (89°C) temperature rise. All electromagnets are **100% Duty Cycle.**

Parallel Pole Electromagnets: Ideal for Pick and Place or Lifting Applications where parts have flat surfaces and can be custom machined to specifically fit the application. Side mounted terminal blocks allow one set of lead wires from magnet to power supply (no splicing required, minimum 18 gauge leads). These electromagnets offer broad application potential due to their ability to deliver improved reach out through air gaps (i.e. painted, plated & coated surfaces).

Rectangular & Round Island Pole Electromagnets: Ideal for Pick and Place or Lifting applications where parts have uneven surfaces or odd shapes and provide concentrated holding power & high responsiveness in manual or automatic applications.

Power Supply: Designed for manual operation. Uses 120VAC input, 16 to 26VDC variable dual output, 10-foot grounded power cord and fuse protection. Temp. range -4°F to 160°F (-20°C - 71°C). Power supplies with automatic reverse pulse upon release are available.

Custom Electromagnets are available.

MAGNETIC COUNTER WHEELS

Magnetic counter wheels can be used with a mechanical counter to measure the length of coiled steel and aluminum. Allowing the operator to monitor shift or roll production, detect shortages or overages and record the amount of defective stock. Unlike rubber faced wheels, magnetic wheels do not tend to slip on oily stock. When used in aluminum applications, magnetic counters can run on the steel feed or pinch rolls.

FEATURES:

» Ideal Wheel dia. is 3.8197" ±0.0010" to measure one linear foot per revolution.

» The face width is 0.813" with a 0.5" long hub with a 1/4-20 set screw.

Description	Model No.
Counter Wheel - 3/8" Bore	5C926-038
Counter Wheel - 1/2" Bore	5C926-050

TRANSPORTERS® & END OF ARM TOOLING

TRANSPORTER[®] LP LOW PROFILE (TPLP)

Low Profile (TPLP) Transporter® Magnets

The Transporter[®] LP is designed to directly replace vacuum cups with minor tooling and valve adjustments. Powerful Rare Earth magnets positively hold the parts during transfer, greatly reducing the chance of slipping and shifting of your part due to oily coatings. An optional "low-skid" boot is also available to increase grip on parts during transfer. A short burst of shop air pressure is applied in order to release parts. Perfect for automated press to press transfer systems, robotic pick & place systems and machine loading/ unloading

FEATURES:

- » Uses up to 95% less air than vacuum cups
- » Outlasts vacuum cups in most applications
- » Grasps odd shaped or perforated parts
- » Increases production and reduces shop air costs
- » Designed for long, maintenance-free operation
- » Operates effectively in any orientation
- » Class "A" blank protection with covered magnets
- » Destacking option prevents double-blanking
- » Powerful Rare Earth magnet positively holds parts no dropping or shifting in the event of air loss
- » Threads onto a variety of typical 3/8 NPT vacuum cup tooling
- » Lightweight, low-profile design for minimal die clearance
- » Easy installation on existing tooling booms or robotic face plates
- » Instantaneous pick-up and release

Transporter LP Options

Double Acting (Option DA): Features 0-Ring seals & extra air inlet that allow a short blast of air to engage or disengage the grip function. The double acting option is only available on the TPLP30 & TPLP50 magnets. Operates at a low pressure of 20 psi (30 psi maximum), allows use of 1/4" Lines & can run up to 16 magnets from 1 valve.

De-stacking (Option DS): The de-stacking option is required for applications de-stacking metal that is thinner than .0478" (18 ga) with the TPLP30 model. The de-stack option features a special magnetic circuit that is designed to de-stack sheets as thin as .030" (22 ga). The optional low-skid boot is required for certain applications.

3/8 BSPP Fitting (Option BS): 3/8 British Standard Pipe Parallel Thread, available on TPLP30 models only.

Transporter LP Accessories

We offer a large selection of TPLP accessory to handle your installation, operation and maintenance requirements such as various mounting options, manifolds and magnet face covers.

The Bulk Head Spring Mount is ideal for installation on end user specified mounting plates. The Proximity switch mount is designed for the TPLP15 and TPLP30 and accepts a 12mm proximity switch.

The **Swivel Mount** or **Spring Compensator** can be added to new or existing Transporter TPLP30's for best part compliance. These lightweight, anodized, aluminum constructed mounts fit most TPLP30 magnets to accommodate material variances and uneven surfaces. Low center of rotation allows magnet to stay on target. Our newly styled upper housing was redesigned with a groove to accommodate these mounts. If your TPLP30 does not contain a mounting groove, a replacement upper housing can be purchased.

Low Skid Boots and Pads protect against marring of class "A" blanks while reducing the likelihood of part shifting and extending the life of the magnet by protecting the face from wear and. The boots cover the edge of the cup for complete blank protection while the pads cover the face of the cup for increased wear protection to extend the life of the magnet.

For more information on this product, contact us by phone, email or visit our website to request a TPLP Tech Sheet.

Grip

Release

TRANSPORTERS® & END OF ARM TOOLING

TRANSPORTER[®] - CYLINDER ACTUATED (TPCA)

Transporter® Magnets are ideal for use where vacuum cups and grippers are typically used for lifting and moving steel sheets, blanks, stamped parts and complete assemblies.

APPLICATIONS & BENEFITS:

- » Automated press to press transfer systems
- » Robotic "Pick & Place"
- » Manual and automated machine loading/unloading
- » Outlasts vacuum cups in most applications
- » Grasps odd shaped or perforated parts
- » Increases production and reduces shop air costs
- » Designed for long, maintenance-free operation
- » Operates effectively in any orientation
- » Will not drop parts if system air-loss occurs
- » Destacking (requires proper magnet selection)

Cylinder Actuated Transporter® Magnets (TPCA)

The patented Transporter[®] utilizes a powerful, Rare Earth, Permanent Magnet to pick and place metal parts in automated transfer and manually operated material handling applications. Offering more options for pick-up points on stamped, forged and formed parts or complete parts assemblies. Offers increased material handling safety and a significant reduction over vacuum cups in shop air costs.

Ideal for steel lifting applications in the Automotive, Appliance and Office Furniture industries and available in many standard and custom configurations to best suit the needs of your application.

FEATURES:

- » Positively holds parts no dropping
- » Instantaneous pickup and release
- » Permanent magnet requires no electricity

OPTIONS:

- » Solenoid control valves
- » Custom designed magnet housings
- » Alternate magnetic circuits for specific lifting requirements
- » Magnet mounted control valves
- » Magnets designed into ergonomic lifting systems

For more information on this product, contact us by phone, email or visit our website to request a Transporter Tech Sheet.

TRANSPORTER[®] MAGVAC (TPMV)

The Transporter® MagVac combines magnet technology with vacuum cups to create a next generation lifting tool.

BENEFITS:

- » Powerful magnetic gripper combined with a vacuum cup for powerful holding
- » Lift steel or perforated parts as well as aluminum and stainless steel
- » Perfect for robotic systems, press transfer systems and all sheet metal applications
- » Vacuum pads can be removed for single use as a standard lift magnet on ferrous parts
- » No more replacing vacuum cups every week
- » No dropping parts from loss of air (for ferrous parts), excess mill oil or weld slag
- » Maximum temperature of 176°F (80°C)
- » All suction cup pads are made from Thermoplastic Polyurethane/TPU

For more information on this product, contact us by phone, email or visit our website to request a Transporter Tech Sheet.

IXTUR[®] PNEUMATIC MAGNETS

IXTUR Pneumatic Magnets are ideal for use where vacuum cups and grippers are typically used for lifting and moving steel sheets, blanks, stamped parts and complete assemblies. Perfect for automated press to press transfer systems, robotic pick & place systems and machine loading/unloading.

BENEFITS:

- » Outlasts vacuum cups in most applications
- » Grasps odd shaped or perforated parts
- » Increases production and reduces shop air costs
- » Operates effectively in any orientation
- » Will not drop parts if system air-loss occurs
- » Maximum operating temperature 122°F (50°C)
- » Double-Acting ON/OFF Air pressure required only to change state from off to on and on to off.

For more information on this product, contact us by phone, email or visit our website to requestan iXTUR Tech Sheet.

FANNERS FOR SHEET SEPARATION

SHEETSEEKER® - ERGONOMIC PERMANENT MAGNETIC FANNERS

The SheetSeeker[®] (U.S. Patent: 6,845,976) is a breakthrough in magnetic sheet fanner technology. The magnetic circuit is lifted and locked into place for introduction to a stack of sheet steel. Once the stack is in place, the sliding magnet is unlocked and automatically centers on the top of the stack, fanning the sheet stock. As each sheet is lifted away, the magnet indexes down automatically, fanning to the bottom of the stack.

FEATURES:

- » Powerful, Rare Earth, automatic-indexing magnetic circuit
- » Up to 60% lighter than standard sheet fanners with the same fanning strength
- » Magnet automatically indexes down to ensure optimum fanning down to the last sheet
- » Lightweight design and convenient top mounted carry handle allow for user-friendly transport
- » Minimum height of 12" with custom designs and options available
- » Fans from 30 gauge sheets to 3/16" plate
- » Durable stainless steel construction
- » Slide handle for positioning the fanning circuit
- » Top locks for slide handle
- » Break Away Bar
- » Optional On/Off magnetic base for easy installation and removal

For more information on this product, contact us by phone, email or visit our website to request a Fanner Tech Sheet.

AIR CYLINDER FANNERS - PERMANENT MAGNETIC FANNERS

Air Cylinder Actuated Sheet Fanners have an air release system that pulls the magnet inside away from the face of the fanner for easy and safe removal of the fanner from the stack.

FEATURES:

- » Reduce costs and increase safety for destacking steel sheet stock
- » A powerful, Rare Earth magnetic field automatically separates sheets
- » As the top sheet is removed, the next sheet instantly fans up
- » Assists prying apart sticky, oily, pre-finished or polished sheets
- » Eliminates die-damaging double blanking in automated operations
- » On/Off of an electromagnet with the benefit of a permanent magnet
- » Allows for mid stack change over

Permanent Magnetic Fanners handle steel sheets of almost any length, width or shape. The sheets near the top of the stack separate instantly from a 1/2" to 3/4" gap, depending on sheet thickness and size.

For more information on this product, contact us by phone, email or visit our website to request a Fanner Tech Sheet.

AIR SPRING FANNERS - PERMANENT MAGNETIC FANNERS

Air Spring Fanners have an air spring system that pushes the magnet inside toward the face of the fanner when air pressure is present. When the air pressure is turned off or disconnected the air spring will deflate and the magnet will move away from the face of the fanner creating air gap that in essence turns the magnet off. This eliminates the risk of having metal accidently attracted to the fanner during transportation or stack changeovers.

FEATURES:

- » Powerful, Rare Earth, magnetic circuit
- » On/Off capability helps prevent injury when introducing new materials to the fanner
- » "Fail-Safe" mode automatically returns the magnet to the "Off" position with loss of air pressure
- » Fans from 30 gauge sheets to 3/16" plate
- » Durable stainless steel welded cover construction

For more information on this product, contact us by phone, email or visit our website to request a Fanner Tech Sheet.

U.S. Patent No. 6,845,976

FANNERS FOR SHEET SEPARATION

PERMANENT MAGNETIC SHEET FANNERS

Permanent Magnetic Fanners handle steel sheets of almost any length, width or shape. The sheets near the top of the stack separate instantly from a 1/2" to 3/4" gap, depending on sheet thickness and size.

FEATURES:

- » Reduce costs and increase safety for destacking steel sheet stock
- » A powerful magnetic field automatically separates sheets
- » As the top sheet is removed, the next sheet instantly fans up
- » Assists prying apart sticky, oily, pre-finished or polished sheets
- » Eliminates die-damaging double blanking in automated operations
- » Three powerful designs for optimum fanning performance
 - Thin Gauge Fanner (TNF), 20 to 30 Gauge
 - Medium Gauge Fanner (MGF), 12 to 22 Gauge
 - Thick Gauge Fanner (TKF), 7 to 12 Gauge
- » Pre-tapped holes for mounting to your equipment
- » Bolt on angle base plate and handle with mounting hardware included
- » Durable welded construction

For more information on this product, contact us by phone, email or visit our website to request a Fanner Tech Sheet.

AIR KNIFE FANNERS - PERMANENT MAGNETIC FANNERS

Permanent Magnet Sheet Fanners with Air Knives allow for ferrous and non-ferrous sheets to be separated in destacking applications. While the magnet force will work with all ferrous metals, the air knives separate all non-ferrous metals by pushing air in between the sheets causing them to rise up from one another.

FEATURES:

- » Reduce costs and increase safety for destacking ferrous and non-ferrous sheets
- » A magnetic field automatically separates ferrous sheets
- » Powerful air knives automatically separate non-ferrous sheets
- » As the top sheet is removed, the next sheet instantly fans up
- » Assists prying apart sticky, oily, pre-finished or polished sheets
- » Eliminates die-damaging double blanking in automated operations
- » Handle steel sheets of almost any length, width or shape
- » Sheets near the top of the stack separate instantly.

For more information on this product, contact us by phone, email or visit our website to request a Fanner Tech Sheet.

MAGNETIC PINFANNERS[™] - PERMANENT MAGNETIC FANNERS

Use pallet mount Permanent Magnetic PinFanners[™] with Hex, Round or T-Slot Pallet Pins in Stacking/ Destacking, Blanking Lines and Press Feeding applications. PinFanners[™] can be used to separate curved edge or odd shaped blanks. PinFanners[™] stay right on the pallet, from the blanking line to the press, without any extra set up! Adjustable magnet positions ensure direct contact with the blank for maximum fanning ability. Mounted directly to the pallet, PinFanners[™] reduce maintenance down time on blanking lines. *For more information on this product, contact us by phone, email or visit our website to request fanner Tech Sheet.*

ADJUSTABLE STRENGTH PERMANENT & APPLICATION SPECIFIC FANNERS

CONVEYORS & CONVEYOR COMPONENTS

CONVEYORS - LOW PROFILE

FEATURES:

- » Available in Magnetic and Non-Magnetic models
- » Sized to match your application requirements
- » Low profile design allows for fast belt replacement, reducing downtime
- » Oil and abrasion resistant endless urethane belts for longer belt life & less maintenance
- » Crowned take-up pulleys for easy belt tracking and take-up adjustments
- » Crowned drive pulleys are for positive belt traction and accurate alignment
- » Magnetic unit circuits are the same width as the belt to hold parts firmly from edge to edge
- » Gang or individual drive options are available

For more information contact us to request a Conveyor Tech Sheet.

CONVEYORS - TRANSFERRING & FEEDING

Magnetic Transfer Conveyors are ideal for automating sheet handling in various applications including: stamping, forming, sheering, slitting, sorting and stacking. Magnetic Transfer Conveyors contain permanent, Perm-Electro or electromagnetic rails that work to automate processes and decrease handling for improved production and safety.

Sheet sizes, thickness, weights, surface treatments and direction of transfer are all taken into consideration when designing a transfer conveyor for your application.

APPLICATIONS:

- » Stacking/Destacking lines
- » Part transfer between work stations and presses
- » Press feeding
- » Coil unloading

FEATURES:

- » Easy belt removal opposite of drive side
- » Drive system can be mounted on either side of the conveyor and conveyors can be gang driven

MAGNETIC SKATE RAIL

Magnetic Skate Rail is ideal for use in conjunction with Magnetic Transfer Conveyors in stacking, destacking and press feeding applications. Typically positioned on the outside edge of a blank and parallel to magnetic transfer conveyor(s), the Skate Rail Magnets hold steel blanks securely up against a series of rollers, preventing flexing or bending of the sheet as it is conveyed. The rollers allow blanks to roll easily. The magnet position can be adjusted to accommodate the size and thickness of different blanks.

BENEFITS:

- » Prevents bending, flexing or sag of large sheets during transfer, outboard of magnetic conveyors
- » Reduces the need for additional magnetic conveyors

For more information contact us to request a Skate Rail Tech Sheet.

ELECTROMAGNETIC CONVEYING RAIL

Magnetic Electro-Rail is commonly used for automated conveying, transferring and lifting of steel sheets and parts in various industries including: Automotive, Appliance, and Office Furniture. Electro-Rail eliminates the need for costly and time -consuming manual handling and feeding of presses. Magnetic Electro-Rail increases production speeds and improves safety.

Using a powerful electromagnetic circuit to move and hold steel objects during conveying, these electromagnets provide On/Off capability and allow the user to control drop points throughout the system.

For more information contact us to request a Conveying Rail Tech Sheet.

can be gang driven

APPLICATIONS:

- » Stacking/Destacking Lines
- » Press Feeding

FEATURES:

- » Powerful permanent magnetic circuit
- » Adjustable magnetic strength
- » Neoprene rollers prevent scratching

CONVEYORS & CONVEYOR COMPONENTS

PERM-ELECTRO HYBRID RAIL

APPLICATIONS:

- » For belt transfer of 22 to 12 gauge flat blanks and sheet stock
- » Automated Sheet Handling
- » Transfer of parts between presses
- » Stacking
- » Overhead Conveying

BENEFITS:

- » Automated press feeding
- » Controlled Drop Points
- » No battery backup required

Permanent-Electro Hybrid Rail is used for conveying and transferring steel sheets and parts in various

industries including: Automotive, Appliance and Office Furniture. Hybrid Rail allows for automated handling and feeding of steel items, improving production and safety. This rail utilizes a permanent magnetic circuit to move and hold steel objects during conveying. The coil is only energized for release the parts from the conveyor belt. This is a permanent magnet with an electrical release function. This fast acting On/Off action enables the magnets to be controlled for specific drop points throughout the conveying system.

PERMANENT CONVEYING RAIL & ROLLS/PULLEYS

Magnetic Conveying Rail utilizes powerful permanent magnets to hold ferrous parts such as steel containers, composite cans, lids and more firmly in place during conveying. The magnetic rail is installed as a stationary component and allows the conveyor belting to ride over the top of it. The strong magnetic field holds parts tightly to the belt surface, even during vertical, inclined or horizontal conveying. Conveying speeds can be increased while eliminating the slipping or rolling of items.

BENEFITS:

- » Increased production rates
- » Uniform part orientation and holding
- » Straight, curved or radius designs » Powerful Permanent Magnets

Additional benefits include better utilization of space within a facility, noise reduction, correct part orientation and on-time material flow. IMI has a full line of quality magnetic components available in a wide variety of sizes and strengths to meet your application needs.

For more information on this product, contact us by phone, email or visit our website to request a **Conveying Rail Tech Sheet.**

CUSTOM MAGNETIC CONVEYING SOLUTIONS

Factory experts will develop a custom magnetic conveyor solution. IMI will provide support throughout the entire process from field sales support to design, manufacturing and final testing.

For more information on custom conveying products, please contact IMI at 888.582.0823 or go to www. magnetics.com

Test Blanks Off End of Coi

Stacking Round Blanks

Has Your Lift Magnet Been Tested?

Lift Magnets cannot be visually inspected alone. Lift Magnet Failure is often the result of internal damage to the magnetic material and is not evident by simple visual inspections that can be performed on other lifting devices.

Our Lift Magnet Testing and Certification Service performs both a thorough visual inspection and functional testing of your magnetic lifting products using testing techniques and equipment that meet the ASME B30.20 Standards for Below-the-Hook Magnetic Lifting Devices.

After testing, we provide documentation of the testing and a certificate of conformance if the magnet meets the manufacturer's labeled Working Load Limit (WLL) rating. Damaged label replacement is also included for Industrial Magnetics Inc. labeled Lift Magnets.

COMMON FACTORS FOR LIFT MAGNET LOSS OF PERFORMANCE OR FAILURE

- 1. Blunt force impact such as dropping, or banging on, the lift magnet can cause fractures in the magnet material
- 2. High heat: If the magnet is exposed to temperatures above its' capabilities it will lose magnetism
- 3. Exposure to electrical fields, like generators or welding ground circuits, will result in loss of magnetism.
- 4. External factors that influence a lift magnet's performance are; nicks, scratches, gouges, rust, etc. to the contact surface of the lifter.
